Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 12/30/2005 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 16-18 and 34-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 16 and 34 recites the limitation "said synthesized data" in last line of both the claims. There is insufficient antecedent basis for this limitation in the claim.

Claims 17-18 and 35-36 are also rejected because they are dependent upon the independent claims 16 and 34 respectively.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2623

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 16-18 and 34-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clark et al (US 4829568).

With respect to claim 16 (as best understood) Clark discloses a printing system that includes a generator configured to generate additional data based on received data, and a synthesizer configured to synthesize additional data with image data, (see col. 1, lines 50-68, wherein the postage is printed with some additional data encrypted on it). However, he fails to explicitly disclose an analyzer configured to analyze said received data to generate image data, as claimed. But, the as seen from the figure 1 there exist a seed word that is use to start the process in order to come up with an image as the final product.

Therefore, it would have been obvious to one ordinary skilled in the art at the time of invention to see the seed word as the received code data in order to come up with a final synthesize data that has the additional data with it in order to provide a system that will stop the fraudulent labels by encrypting the image with some concealed information.

With respect to claim 17 and 18, Clark further discloses the coordinate information and the outline font of the characters, (see figure 6) as claimed.

Claims 34-36 are rejected for the same reasons as set forth in the rejections of the claims 16-18, because claims 34-36 are claiming a method for the apparatus claimed in claims 16-18.
